MERN Stack Developer

Wayanad,Kerala-670645

ABOUT ME

Passionate and self-driven MERN stack developer with a proven track record of success in web development. I have honed my skills and expertise in modern technologies, such as React, Node.js, Express.js, and MongoDB, through self-teaching. My portfolio showcases two industrial-level projects: an e-commerce website named Narphocart and a website platform that combines social networking and job portal features named Skillset network, as well as several mini-projects that demonstrate my versatility. I am dedicated to developing web applications that seamlessly blend user-friendliness with appealing design. My relentless pursuit of excellence and commitment to delivering results make me an ideal candidate for a MERN stack developer role.

EDUCATION

MERN Stack Developer

Bootcamp (Self-taught platform)
2022- Present

Diploma in Computer Engineering

Government Polytechnic college Meppadi
Graduation Year: 2022

SKILLS

Front-End Development

- React.js
- Redux Toolkit
- Context API
- Tailwind CSS
- EJS | HBS
- HTML | CSS
- Bootstrap
- Axios
- Ajax

Back-End Development

- Node.js
- Express.js
- MongoDB
- Mongoose
- PostgreSQL
- JavaScript
- JWT
- MVC Architecture
- REST API

PROJECTS

SKILLSET NETWORK

[Live link](#) | [source code](#)

(Social Networking and Job Portal Platform)

- Developed a responsive web application using the MERN stack (MongoDB, Express.js, React.js, Node.js) called Skillset Network, a combination of social networking and job portal.
- Established user roles (Admin, Companies, Job Seekers) and ensured secure authorization through JSON Web Tokens (JWT), implementing user registration with OTP (One-Time Password) using nodemailer for secure and verified sign-ups on both sides.
- Enabled seeker's features including Job application and saving jobs, create Networking with other job seekers, Real-time chat with potential companies, Password management including forgot password, reset password, and premium feature as Sharing posts and comments.
- In Admin side implemented the features for user , company , job, accounts, notifications and graphs managements.
- In company side implemented the features for sharing job vacancies, managing overview including hire pool, employees. Notifications regarding job applied requests and employ requests. Real time chat with seekers.
- Technologies used: React.js, Node.js, Express.js, Mongoose, JWT, Nodemailer, Tailwind CSS, Stripe, Socket io, Axios

NARPHOCART

[Live link](#) | [source code](#)

(E-commerce website)

- NarphoCart is an e-commerce platform which provides user-friendly interface, secure transactions, authentication, product listing, wishlist, shopping cart, single buy, Wallet, OTP verification , profile management, order tracking and cancellation etc.
- In Admin side implemented user management, product management, coupon management, category management, sales report and graphs.
- Technologies used: Node.js, Express.js, EJS, MongoDB, Ajax, jQuery, Bootstrap, Javascript, Razorpay, Multer, Nodemailer.

Integration Technologies

- Stripe
- Razorpay
- Multer
- Nodemailer
- Socket.IO

Tools and platforms

- Git
- AWS
- NGINX
- Firebase
- Figma
- Render
- Vercel
- Postman
- Data Structures

MINI PROJECTS

Netflix clone

[source code](#)

- Developed Netflix clone application
- Integrated the TDNMA API to provide real-time content details.

OLX clone

[source code](#)

- Developed OLX clone application
- Utilized firebase for user authentication, enhancing security and user management.
- Used Context API for efficient global management across the application.

To-Do List

[source code](#)

- .Developed To-Do List clone where user can add, delete, edit and mark as complete in the activities using React.js
